1 Thessalonians 5:24
Faithful is He that calleth you!

Praise the Lord for blessing us with the property in Bullet Tree Falls Village. When we moved to Belize in 2017, we had plans to minister in two different villages for as long as we could. This has proven to be very difficult because of logistics and road conditions. Right now, we are limited to one service a week in Bullet Tree. We were advised by Belizeans not to be traveling at night on a regular routine. The road into our village is remote and has a tendency to be unsafe for night travel, so we have started building a small house on the church property in Bullet Tree. We believe that when we are able to devote all of our time in this village that we will see much fruit from the labor.

Our people are excited that we will be living in the village and we hope to have the house livable by May 2019, as the Lord provides for this project.

We are in the process of finishing the necessary work on our property at Bullet Tree Baptist Church. We need more dirt to make this property usable, as well as three sides of property fence. This is needed for the additional 1 plus acres of land and will serve as a barrier for our watch dogs and for our protection as well.

Future Goal

One of our future ministries at Bullet Tree Baptist is to have a learning center available for the children in our village. The learning center would be open 2-3 evenings a week in order to assist students with reading, math, and research papers that require the use of internet and printer. We, along with church members, will take on the responsibilities of this ministry. The learning center will give us the opportunity to reach many children of all ages on a weekly basis. At this time, we have 2 open air buildings and our plans are to enclose one to make it usable for the learning center. In order to make the building functional, the walls need be enclosed by laying more block, adding windows, an entrance door, and more electrical devices. Once the building is complete, we would need at least 4 computers/laptops and 2 printers. We would like to finish this project by the next fiscal school year in September 2019. The learning center will be a blessing for the students that do not have access to the necessary items in order for them to excel in their studies.
